

Adaptable Solutions Technical Infrastructure Services

Dynamics AX System Performance Audit

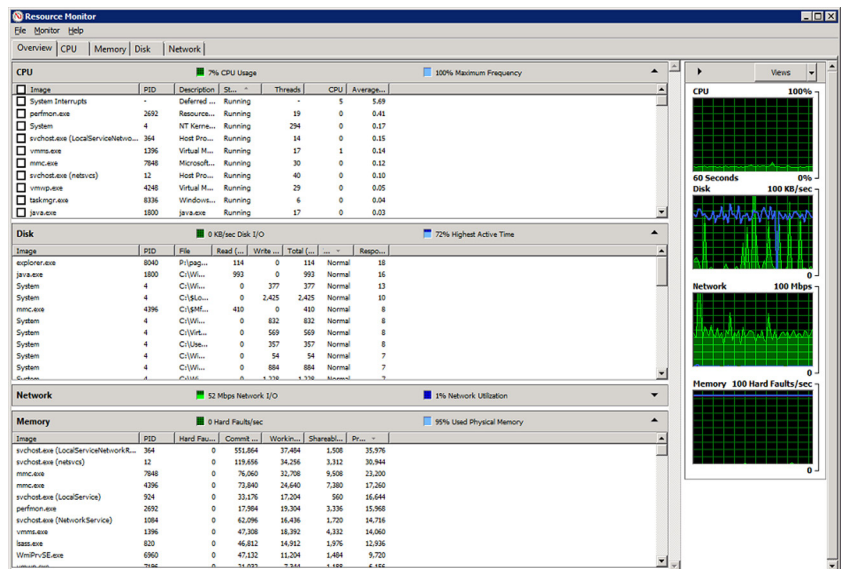

BENEFITS SUMMARY:

- **Minimise the risk of AX system failure**
- **Know that your AX system is performing to its full potential**
- **Enjoy peace of mind knowing that your AX system is being reviewed by AX experts you can trust**
- **Simplify the management of your AX system infrastructure**
- **Ensure your AX system is configured according to current Microsoft Best Practices**

Would you like your Dynamics AX System configured to perform to the highest standards in accordance with industry Best Practices?

The Microsoft infrastructure, including AX Servers, AX Clients and SQL Server are all crucial to delivering acceptable user performance and reliability.

Our experts will work with your incumbent infrastructure supplier to complement their service offering with our specialist knowledge of the Dynamics AX system architecture and how to get the best from it.

Industry commentators recommend that this type of Audit/Performance Review should be carried out at least annually, or as required if user performance is not as expected.

This is where Adaptable Solutions Technical Infrastructure Services (TIS) can help you.

How will the service be delivered

We have a series of tools and utilities that will monitor, measure and collect information from your Dynamics AX and SQL Server database infrastructures, checking important things such as:

- Processor Configurations
- Memory Configuration
- RAID System Configuration & Optimisation
- NTFS Partition Optimisation
- Database Index Best Practice
- Database File Sizing
- Transaction Logs
- System Disk Bottlenecks
- Windows Event Logs
- Service Packs
- Dynamics AX Index Best Practice
- AX System Backups
- Configuration Keys
- Client to Server Network Latency
- System Transaction Volumes

What outcome can you expect?

- A documented analysis of your Dynamics AX and SQL Server Systems with specific recommendations on how to improve its performance
- Optional follow-up reviews to verify that recommendations have been fully and correctly implemented
- Documented & prioritised risk areas that may affect the up-time and data integrity of your Dynamics AX system
- The benefit of expert advice from an Adaptable Solutions infrastructure consultant with extensive experience in Dynamics AX and SQL Server setup & tuning

Our recommendations will help you achieve the following goals:

- A Dynamics AX system that is performing to its full potential
- A Disaster Recovery and Business Continuity Strategy that you can rely on
- Information to assist your budgeting and planning for future hardware & software upgrades
